

ICURY (ICY) is now also listed at [Bitcratic](#). It was already listed at the [txbit.io exchange](#) where it can be traded against bitcoin and ethereum, Etherdelta, and other DEXs. For trade you need tokens. If you don't have these already, please participate in ICURY's 4th airdrop. The conditions are set forth below.

## Airdrop 4: Join the Pilot and Receive 125 ICURY for Free

Airdrop 1, 2 and 3 are just closed. In these airdrops around 300 Icecat or Iceclog users joined the [ICURY](#) pilot and received free tokens. A number of these registered at txbit exchange, and the first trades have been made. A fourth airdrop pilot starts now for the next 100 Iceclog users with a member profile, and they will receive 125 free ICURY. As it goes very fast, a subsequent airdrops are being foreseen in case of this airdrop being oversubscribed as well.

If you already want to join the ICURY pilot, because you like free tokens that you next can trade on txbit.io, or you want to join the experiments in our ecosystem, what are the requirements to participate?

1. You need a Iceclog user profile. You can [create one for free](#). Make sure that you have a **complete** and **credible** profile including an image, links to your real social media profile(s) and other requested data, and join at least one relevant [Group](#): the ICURY group. (No need to sign up for other groups if they are irrelevant to you).
2. You mention a link to this airdrop on social media (Twitter, Facebook, LinkedIn elsewhere) and you post a link to this post in the ICURY group on Iceclog as proof.
3. You [register for the pilot to receive ICURY for free](#) and enter your ethereum wallet. No wallet yet? Go to [myetherwallet.com \(free\)](#)
4. You are willing to provide us with feedback: suggestions and comments.

This airdrop is only open to people who didn't participate in the 1st, 2nd or 3rd airdrop. We are convinced that this another small step in one of the most exciting journeys in the field of e-commerce.

## AIRDROP IV: Join ICURY Pilot and Get 125 Free ICY Tokens (ERC20). Now Listed at Bitcratic.

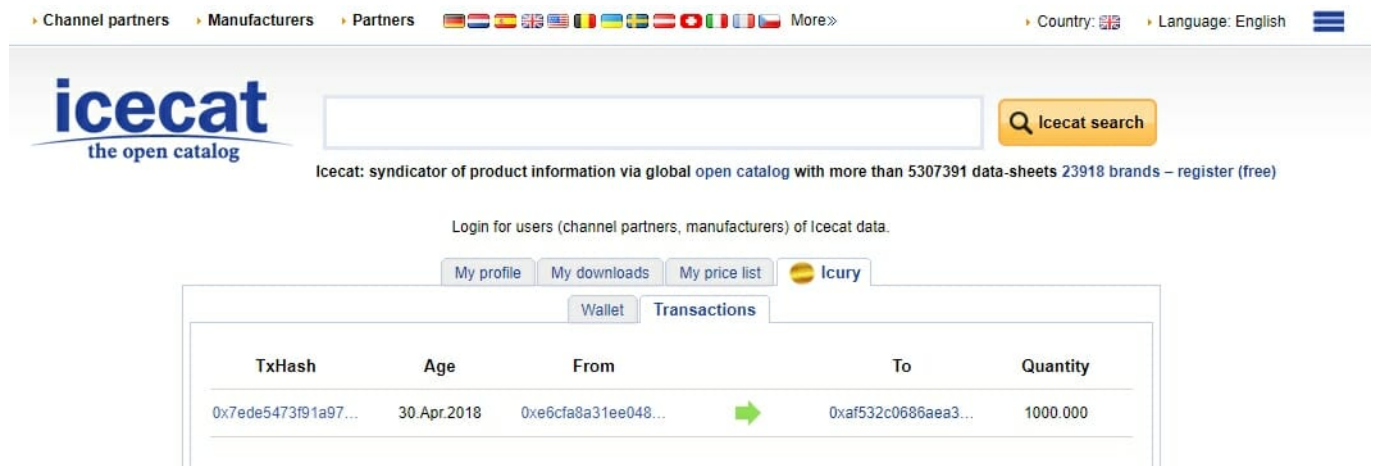

After airdrop 4:

- airdrop 5: 100 participants receive 62.5 ICY. Requirements might be updated.

The conditions can be adapted or changed by the board of Icecat in response to outside events or behaviour of participants. Every next airdrop will only distribute half the amount of tokens as the previous one.

## Peer-to-Peer

The currently distributed ICURY (ICY) tokens can be used for peer-to-peer transactions, as all cryptos. As a first step into our ICURY pilot, we have enabled connecting your Ether wallet address which might contain ICURY tokens, to your Icecat account, to view the ICURY balance, and view your ICURY transactions as recorded on the Ether blockchain.

The screenshot shows the Icecat website interface. At the top, there are navigation links for 'Channel partners', 'Manufacturers', and 'Partners', along with flags for various countries and a 'More>>' link. On the right, there are options for 'Country: GB' and 'Language: English'. The main header features the 'icecat the open catalog' logo and a search bar with an 'Icecat search' button. Below the header, there is a login prompt for users and a navigation menu with 'My profile', 'My downloads', 'My price list', and 'Icury'. The 'Icury' section is active, showing a 'Wallet' and 'Transactions' tab. The 'Transactions' tab displays a table with the following data:

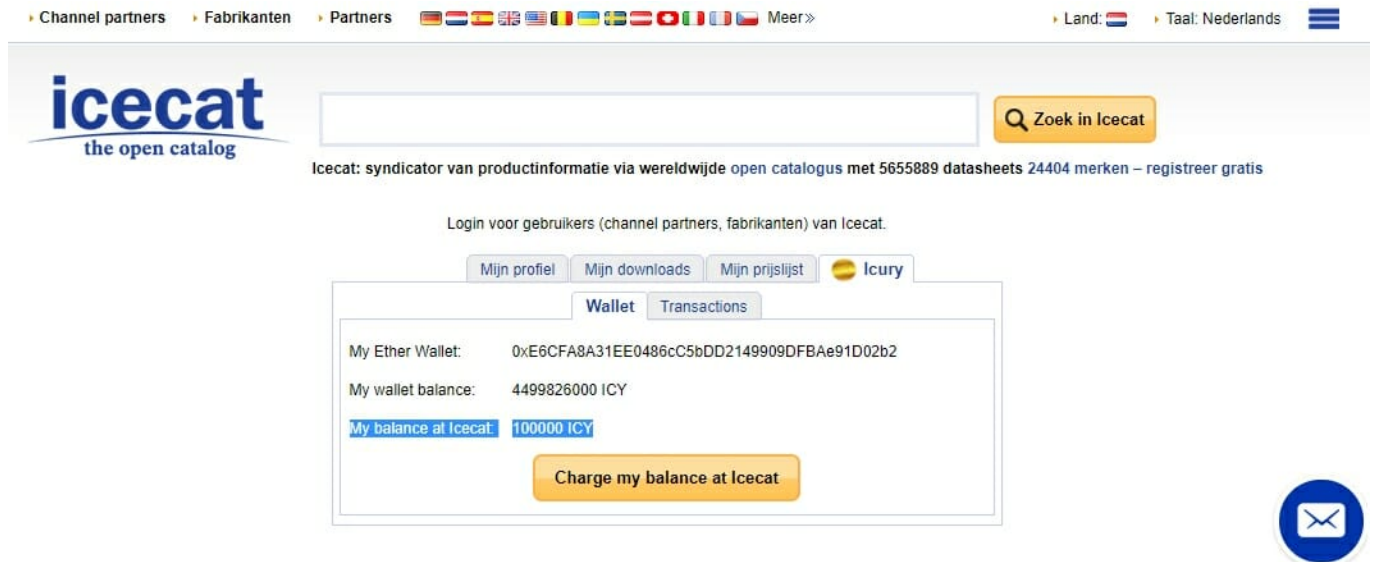

TxHash	Age	From	To	Quantity
0x7ede5473f91a97...	30.Apr.2018	0xe6cfa8a31ee048...	0xaf532c0686aea3...	1000.000

## Charge your Icecat balance

As an Icecat user, you might have noticed that in your user account a new tab has become visible, named ICURY, the Icecat crypto currency, created with an ERC20 smart contract. We just have activated the next little step during Summer: you can charge your Icecat account with ICY from your ether wallet. The result will be shown in a next line called "My

## Possible next steps: paying for services & receiving loyalty coin

Icecat is continuously evaluating possible next steps. Pilot options are:

- Free distribution of existing tokens in new trials such as the Iceclog one, after the first one regarding Icecat users.
- Payment of certain Icecat services with ICURY tokens, such as creation of a new brand, definition of a new category, requesting the creation of product data-sheets etc.
- Listing ICURY tokens at an exchange.
- Receiving loyalty tokens linked to certain actions that benefit the Icecat ecosystem.

## 2FA

Although in this phase, the security risks regarding the ICURY tokens are very limited, we advise you in general to switch 2FA (Two Factor Authentication) on. The option for this can be found in the general user settings in your Icecat account.
