

# **NEW: WooCommerce Icecat Connector Version 1.2 Now Available**

Iceshop has further improved its [WooCommerce Icecat connector](#). The connector will now also set global attributes in your WooCommerce environment.

## **What is new? And what are the benefits?**

What are the key benefits of the WooCommerce/Icecat connector? This connector enables the [automated enrichment](#) of products within your WooCommerce assortment with the rich product content directly from the [Icecat](#) catalog. The connector can also be used in combination with other Iceshop WooCommerce connectors for assortment integration and e-ordering.

With the new improvement, the connector does not only set attributes as custom attributes for each product. It now also sets the global attributes which you will be able to use in your filterable set-up within WooCommerce. When you are using the connector without our Icepim installation, it will automatically feed all attributes from Icecat marked as searchable within the Icecat datasheets of the products that are in your WooCommerce shop.

Are you using Icepim as well? In that case, you will be able to manage the searchable attributes within your Icepim environment. Only the attributes you mark as searchable will be set as global attributes within WooCommerce.

# Global attributes in WooCommerce

**Attributes**

**Add new attribute**

Attributes let you define extra product data, such as size or color. You can use these attributes in the shop sidebar using the "layered nav" widgets.

Name

Name for the attribute (shown on the front-end).

Slug

Unique slug/reference for the attribute; must be no more than 28 characters.

Enable Archives?  
Enable this if you want this attribute to have product archives in your store.

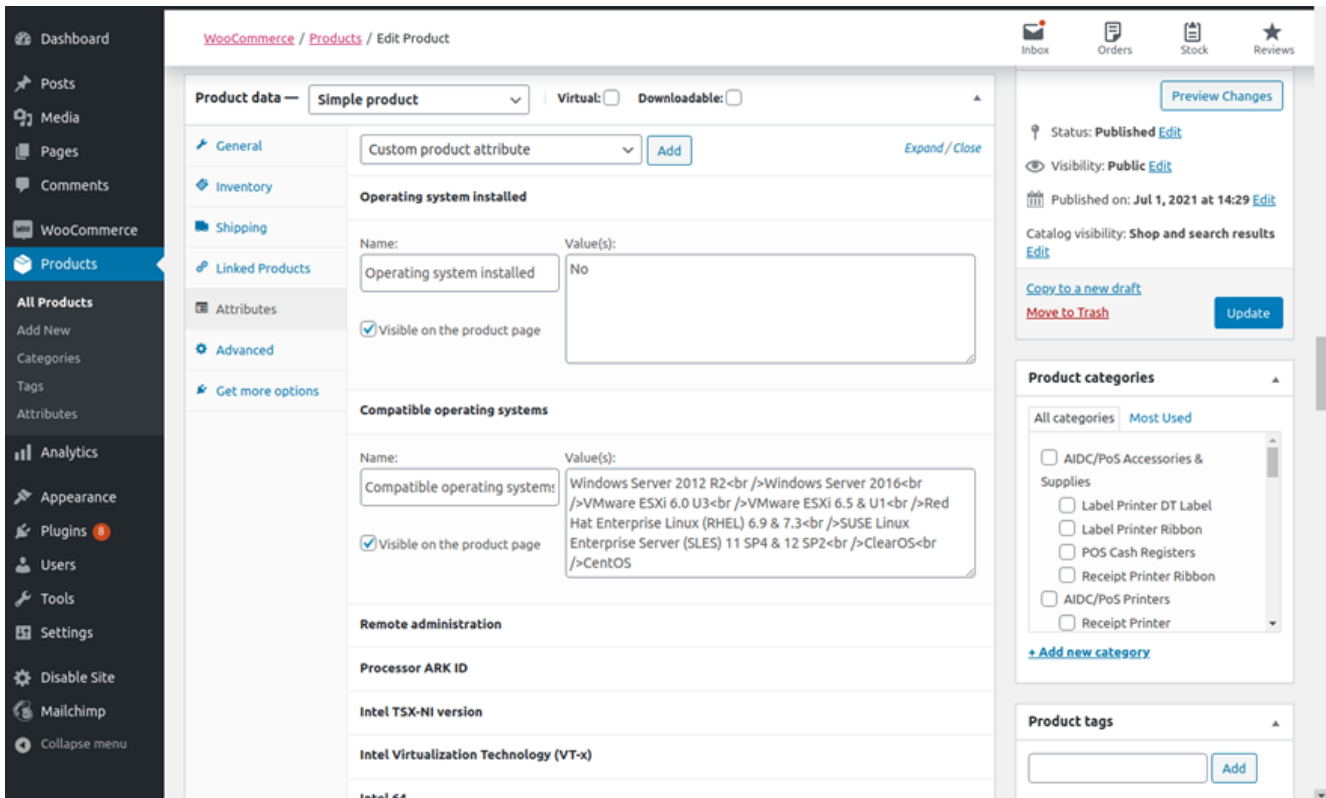

Default sort order

Determines the sort order of the terms on the frontend shop product pages. If using custom ordering, you can drag and drop the terms in this attribute.

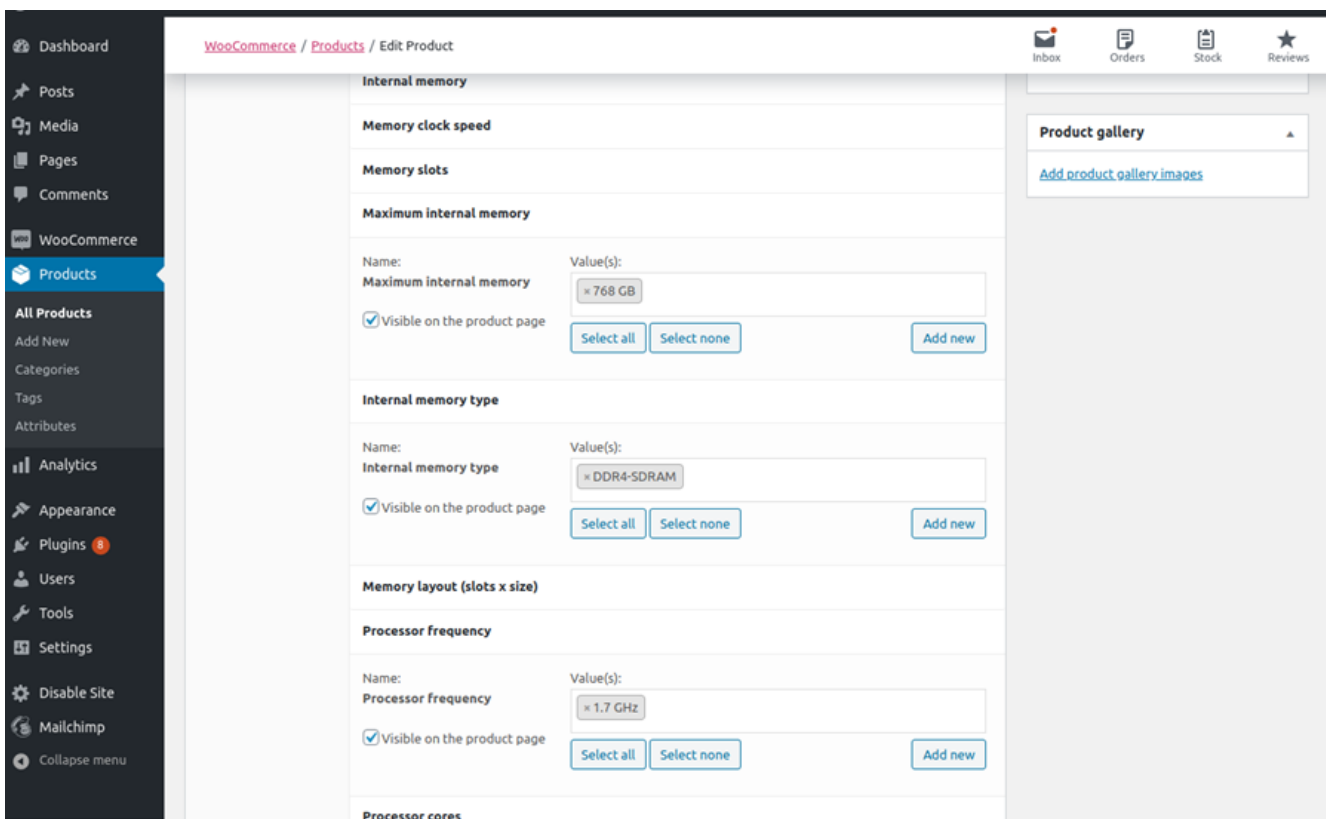

Name	Slug	Order by	Terms
<b>Card reader integrated</b>	i_cardreaderintegr_3374_1	Custom ordering	Yes <a href="#">Configure terms</a>
<b>Chassis type</b>	i_chassistype_734_1	Custom ordering	Rack (2U) <a href="#">Configure terms</a>
<b>Discrete graphics adapter</b>	i_discretegraphics_27905_1	Custom ordering	Yes <a href="#">Configure terms</a>
<b>Display included</b>	i_displayincluded_2177_1	Custom ordering	No <a href="#">Configure terms</a>
<b>Energy Star certified</b>	i_energystarcertifi_838_1	Custom ordering	Yes <a href="#">Configure terms</a>
<b>Internal memory</b>	i_internalmemory_11381_1	Custom ordering	8 GB, 16 GB <a href="#">Configure terms</a>
<b>Internal memory type</b>	i_internalmemorytyp_427_1	Custom ordering	DDR4-SDRAM <a href="#">Configure terms</a>
<b>Maximum internal memory</b>	i_maximuminternalm_1452_1	Custom ordering	768 GB <a href="#">Configure terms</a>

Within the custom product attributes overview, you will be able to see global attributes as well.

Example of not global set attributes in product overview (not searchable marked in Icecat datasheet)

# How to update to the last version?

It is possible to update the module with standard WordPress plugin update methods.

Upload files via FTP or use the WordPress install plugin page. The update file is available on request for the current users. Please sent an e-mail to [supportdesk@iceshop.nl](mailto:supportdesk@iceshop.nl) to request the file.

# How does the update work with your current set-up?

The plugin will delete old custom attributes and insert new ones as global attributes automatically with the first update. So there is no need to do anything extra at your side. The connector also automatically updates the global attributes. When there is a new one, it will add it and when an attribute is not used anymore by any of the products within your assortment, it will delete the attribute.

With respect to already set global attributes within your WooCommerce environment, the connector only adds its own attributes. So if you have already created global attributes within your WooCommerce environment, make sure to delete any duplicates from the ones that were set manually/not connector-created attributes after the installation. You will be able to recognize the attributes set via the connector (slug starts with "i\_").

Name	Slug	Order by	Terms
Card reader integrated	i_cardreaderintegr_3374_1	Custom ordering	Yes <a href="#">Configure terms</a>
Chassis type	i_chassistype_734_1	Custom ordering	Rack (2U) <a href="#">Configure terms</a>
Discrete graphics adapter	i_discretegraphics_27905_1	Custom ordering	Yes <a href="#">Configure terms</a>
